Education

RV College of Engineering, Bangalore, Indi
● *Electrical and Electronics | CGPA: **7.75***
Guru Nanak Public School
● *CBSE (Class XII), Aggregate:87.4%*
B.N.S.D Shiksha Niketan Inter College
● *U.P.Board (Class X), Aggregate:91.6%*

Skills & Subjects

C++ | HTML | CSS | Java Script | Java | C | C# | SQL | OOPS | Data Structure | ReactJS | MATLAB | CN | Python | Simulink | Pspice
Photoshop | PySpark | Visual studio.NET |RAG| LLM| Spring Boot | Kiel | Microcontroller | Power BI | Control System | ML | Proteus

Work Experience

Stealth | Application developer (ML)
- Develop the website frotend using Reactjs and ShadCN
- Work and development of RAG based modelon OpenAi Api using pinecone vector database for user choice information storage.
- Built the model backend using mongoDB and S3 bucket for user information storage and connect it to frontend.

Tektronix | Software Engineer
- Designed PCIe signal generation using AWG for client-specific needs.
- Reduced testing costs by using AWG over BERT for DUT data rate testing.
- Developed and enhanced a web app for PLLBW with .NET backend, using React and HTML/CSS for a modern, responsive UI.

Clinify | Community manager
- Coordinating online events for community, ensuring engagement and connection among members
- Facilitated collaboration between the community's development team and its members.
- Hosted singing, coding, and design contests in our community, fostering creativity and connection.

Projects

Know BTC: OHLC Analysis || ***Python, NumPy, Pandas, Plotly, Matplotlib, Clufflink***
- Gather Bitcoin price data by first processing missing values and values to generate clean data and information**.**
- Analyze Bitcoin OHLC (Open, High, Low, Close) prices through candlestick chart visualization for technical pattern identification.
- Bitcoin's OHLC price is analyzed annually, quarterly and monthly and plot variation using Plotly library.

Predict-or: A Stock Price Predictor || ***Python, NumPy, Pandas, Plotly, Matplotlib, ML, Seaborn***
- Collect gold price data, preprocess it by handling missing values and outliers, to create a clean and informative dataset.
- Use Random Forest Regression on Train data, predict with a separate test dataset, and evaluate using regression metrics.
- Compare actual and predicted gold prices, achieving 98.7% accuracy when the predicted values closely match the actual values.

Book Matchmaker || ***HTML, CSS, JS, Python, NumPy, Pandas, Plotly***
- Design a Model based on popularity and Collaborative Filtering based recommendation system.
- A stylish webpage merging HTML, CSS, and JS for a book recommendation system with popularity and collaborative filtering.

Campus Wave || ***HTML, CSS, React, Axios, Django, Django REST Framework (DRF), PostgreSQL***
- Developed a College Management System with React frontend and Django REST API backend.
- Enabled CRUD operations for students, courses, and professors via Axios and RESTful APIs.
- Used PostgreSQL for data storage, ensuring scalability and efficient performance.

Coding Profile

● **Hacker rank** – (Link)
● **GFG** (400+ problems solved) – (Link)

Certificates

- Introduction of Machine learning and its projects –AWS (Click here)
- Joy of Computing Python – **NPTEL Elite Silver Medal** (Click here **)**

Position of Responsibility

- **Carv Hindi**
  Work as a Writer and Actor and Perform various street plays and theater plays across Bangalore and India
- **Teaching assistant at Upay NGO**
  Handled Math and English for the students at NGO.
- **National Service Scheme(NSS) of RVCE**
  Volunteer for Plog run and Ustarga marathon held in our college.

Achievements & Extra Curriculum

- Qualify National Talent Search Exam (NTSE) Stage I host by Government of India (GOI)
- Awarded **Best Outgoing Student** in B.N.S.D. Shiksha Niketan Inter College in Class 10
- Winner in **Street Play competition** at Jain University, Bits Pilani Goa (Oasis).
